IDENTIFIERS	*Idaho; *Performance Measures for Public Libraries

ABSTRACT

This document is a compilation of input and output measures and other statistics in reference to Idaho's public libraries, covering the period October 1, 1994 to September 30, 1995. This report includes data gathered by the State Library with the "Public and District Library Annual Statistical Report Form" which reflects all monies available to a library during the report year, regardless of the source of funds; all expenditures made by the library, regardless of the source of funds; populations served within legal service areas and also by contract; and collections, services, and staff provided during the report year. Performance measures based on actual data reported are calculated for each library. An individual library's statistics should be considered in the context of its roles, goals, and objectives. A total of 108 out of 117 library entities in Idaho at the end of fiscal year 1995 submitted data for publication. Data for all reporting libraries are listed alphabetically by county and then by library name under each of 12 categories: Population, Borrowers, Facilities, Staff, Directors, Weekly Hours, Operating Income, Operating Expenditures, Collection, Annual Hours and Use of the Library, Circulation, and Interlibrary Loans. Data are also arranged by size of population served, and tables of statistics on volunteer libraries, public libraries by name, and a 1991-95 statewide summary are included. Graphs with data for 1991-95 show total Idaho population versus unduplicated population served by tax supported libraries; operating expenditures per capita; total circulation; and total attendance in Idaho public libraries; and graphs show 1995 operating income and expenditures by source. (SWC)

Statewide Summary 1991-95 Plus Miscellaneous Graphs 92-98

INTRODUCTION

The 1995 edition of the Idaho Public Library Statistics includes data gathered by the State Library with the "Public and District Library Annual Statistical Report Form." That report reflects:

1. All monies available to a library during the report year, regardless of the source of funds;

2. All expenditures made by the library, regardless of the source of funds;

3. Populations served within legal service areas and also by contract; and

4. Collections, services, and staff provided during the report year.

The Report Form complies with the Federal/State Cooperative System for Public Library Data (FSCS). Idaho has participated in FSCS since 1986. The Report Form has varied from year to year as the national database evolves. Since 1990, data have been received from all fifty states and the District of Columbia.

In addition to the actual data reported, a number of performance measures have been calculated for each library. Selected per capita and percentage figures have been generated by computer and are presented in columns next to the data (numerators) from which these measures were derived.

It is important to remember that performance measures and comparative statistics are not absolutes. There are no right or wrong measures and no single measure tells a complete story. An individual library's statistics should be considered in the context of its roles, goals, and objectives. Be creative in thinking about how the information contained in these numbers can help you improve library services. Use them to analyze your services and to work with your local government and your public.

Additional information on the use of statistics may be found in the American Library Association's Planning and Role Setting for Public Libraries (Chicago: ALA, 1987) and Output Measures for Public Libraries (Chicago: ALA, 1987). Assistance in analyzing the statistics and performance measures is available from the State Library Development Division.

NOTES ON THE STATISTICS

A. Locating Data and Performance Measures for Your Library

DATA BY COUNTY [Table 1]
In Table 1, data for all reporting libraries are listed alphabetically by county and then by library name under each of 12 categories: Population, Borrowers, Facilities, Staff, Directors, Weekly Hours, Operating Income, Operating Expenditures, Collection, Annual Hours and Use of the Library, Circulation, and Interlibrary Loans.

DATA BY SIZE OF POPULATION SERVED [Table 2]
In Table 2, all data elements are listed in descending order by TOTAL OR COMBINED POPULATION SERVED, which is defined as: "The population of a library's legal service area (within boundaries of a city or a district) PLUS the population of any other areas served by contract."
Libraries are grouped as follows:

Group 1 - Combined service population more than 10,000

Group 2 - Combined service population from 5,001 to 10,000

Group 3 - Combined service population from 2,501 to 5,000

Group 4 - Combined service population from 1,001 to 2,500

Group 5 - Combined service population less than 1,000

Group averages [means] and medians have been calculated for each group.

B. Reporting Libraries

At the end of FY 1995 there were 117 library entities in Idaho. Of these 109 were publicly funded while eight received no tax support. This year a total of 108 libraries submitted data for publication. The 9 nonreporting libraries are listed below together with the letter code designating type of library:

Albion Community	V
Armoral Tuttle Public	C
Elk City Volunteer	V
Fremont County District	D
Melba Volunteer	V
Priest Lake Volunteer	V
Rae Miller Volunteer	V
Shoshone Public	C
St. Anthony Public	C

Library Type Codes
V=Volunteer
C=City
D=District
O=Other

C. Contracting Libraries

Many libraries in Idaho are party to some type of contract to provide services to other libraries or to receive services from other libraries.

Three libraries are districts which contracted during 1995 to have all services provided to their patrons by other libraries. These three contracting districts have legally established boards and levy taxes, but have no facility, collection or other services. These libraries are included in the data tables. They report Population, Funding and Expenditures, but other data and measures are reported as zero. Services provided to their patrons are included in the numbers reported by the libraries with which they contract. The three districts are:

Bonneville County District
Franklin County District
Fremont County District

Also, Contract Income and Expenditure amounts are deducted from State Total Operating Income (p. 27) and State Total Operating Expenditures (p. 33) to correct for doubling error. See page 4.

D. Libraries with No Public Tax Support

Eight libraries offer some public library services to their communities but receive no regular public tax support from a city or a district. These libraries rely on fundraising activities, donations, and volunteer staff to provide their services. Selected data for these libraries are found in Table 3.

E. Accuracy of the Statistics

The data in all tables are as they were reported by the local library to the State Library except where obvious inconsistencies were spotted. In most cases, revised figures were provided by the local library.

POPULATION

Population figures have been adjusted to reflect the most recent estimates (7/1/95) published by the Bureau of the Census on March 8, 1996. City libraries and county wide districts are as reported by the Bureau of the Census. Also, partial county district populations have been adjusted in counties where it is possible to calculate the population by subtracting the populations of cities with tax supported libraries. There are, however, several districts where other methods for estimating population must still be used, since their boundaries do not match Census "block" units.

Also the State Total for Legal Service Area (bottom line p. 15) has been adjusted to correct for a discrepancy in reported population figures in **Ada County**. The Census Bureau reported Ada County's population as **251,831** while the population as calculated from individual Ada County libraries comes to **264,215**. This is a difference of **12,384**. Since Kuna School/Community extends into Canyon County, an overage of 2,384 has been allowed. The bottom line was consequently reduced by **10,000**, so the state Total Legal Service Area Population is **961,469** for 1995.

The total population for Idaho as of 7/1/95 was **1,163,261**. This is an increase of **156,512** over the 1990 Census figure of **1,006,749**.

TOTALS, MEANS, MEDIANS, PERCENTILES, ETC.

County Totals and Means (averages) are computed in Table 1. Please note that the County Means are computed from the County Totals and not by averaging figures for all libraries within the county.

While all State Means are calculated from bottom line figures there are differences in the way they are calculated, depending on the data type. For example Means for "raw data elements" such as "Annual Circulation" or "Central Libraries" may be calculated by dividing the State Totals by the number of reporting libraries. However, State per Capitas and Percentages are calculated from State Totals and not by "averaging the averages." For example, the State Mean for "Circulation per Capita" is figured by dividing the State Total for "Annual Circulation" by the State Total for "Combined Population Served."

In Table 1, Percentiles [25%, 50% or the Median, and 75%], have been added to the summary section. Of these measures, the Median is probably the most useful. As an "average", the Median is much less sensitive to extreme differences than is the Mean. Remember that the median is defined as the "exact middle" figure. To derive the median, each column of figures is arranged in descending order and then divided in half. For columns having an odd number of entries, the median is an actually reported figure. For columns having an even number of entries, the median is calculated by dividing the sum of the two middle figures by 2.

In Table 2, Means and Medians are calculated for each group [1 -5].

DOUBLING ERRORS

An attempt has been made to correct a "doubling" error which occurs at the bottom line, especially in columns containing data on Population, Funding, and Expenditures. If not corrected, figures for a contracting library may be counted twice, once on its own line, and once again on the providing library's line. In the population tables, the column for Contract Population will sometimes show both plus and minus figures. This allows the reporting of more accurate population data across the page and keeps the "doubling" effect from occurring when totals are added down the page. Figures which are subject to doubling effects are enclosed in boxes.

In the "Total Income" and "Total Operating Expenditures" columns the doubling error has been corrected manually on county subtotal lines and again at the bottom line. Items which have been so corrected, are again placed in boxes.

MULTI COUNTY DISTRICTS

There are four library districts in Idaho whose boundaries cross county lines. For these libraries, all data and measures are listed under the county wherein the central library is situated. MULTI COUNTY libraries are marked with an "@" symbol. The four MULTI COUNTY libraries are: Kuna School/Community [Ada-Canyon], Lizard Butte District [Owyhee-Canyon], Sugar-Salem School/Community [Madison-Fremont], and Nez Perce-Lewis District [Nez Perce-Lewis-Idaho].

DEFINITIONS OF PERFORMANCE MEASURES

This section defines the various measures which are calculated and presented throughout the data tables.

Combined Population Served Legal Population + Contract Population	A library's COMBINED POPULATION SERVED is used as the divisor in calculating all "per capita" measures. The number of nonresident borrowers is not included, except in one "percentage" calculation given below.
Percent COMBINED Registered Borrowers Combined Registered Borrowers / Combined Population x 100(%)	
Percent Nonresident Borrowers Nonresident Borrowers / (Nonres. Borrowers + Reg. Borrowers) x 100(%)	This measure indicates the degree of usage of a library by nonresidents. It is the only measure given which combines nonresident borrowers with resident or "registered" borrowers.
Acquisition Rate [Percentage] Items Added / Total Items Held x 100(%)	This input measure relates the number of new acquisitions to the overall size of the collection. It is the number of titles acquired during the year divided by the number of items held by the library (including the new ones). This measure is expressed as a percentage [4%].
Turnover Rate [Ratio] Annual Circulation / Total Items Held	This output measure is a ratio that relates the number of items circulated to the overall size of the collection. It is the total circulation divided by the number of items held in the collection at the end of the year. The measure indicates the average number of times each item in the collection was circulated, assuming that circulation was evenly distributed among the library's holdings.
Volumes per Capita Total Items Held / Combined Population	This input measure relates the number of items (print and nonprint) in the library's collection to the number of persons in the library's combined service area.
Circulation per Hours Open Annual Circulation / Annual Hours Open Duplicated	This output measure relates the number of materials from the local collection circulated to the number of hours the library is open. It is the total circulation divided by the number of hours the library is open during a year. The measure indicates the average number of items checked out each hour the library was open, assuming that circulation was evenly distributed throughout the year. [Duplicated hours includes main and all branch library hours.]
Circulation per Capita Annual Circulation / Combined Population	This output measure relates the number of items circulated to the number of persons in the library's combined service area. It is the annual circulation divided by the combined population served.

ILL Net Lending Rate ILLs Loaned ILLs Borrowed	This output measure relates the number of materials provided to other libraries through interlibrary loan to the number of materials borrowed from other libraries through interlibrary loan. It is the number of items loaned divided by the number of items borrowed. As a simple ratio, the measure indicates whether the library does more borrowing or more lending. A number greater than 1.0 indicates the library does more lending; a number below 1.0 indicates the library does more borrowing.
ILLs per 1,000 Circulation ILLs Borrowed x 1,000 Annual Circulation	This output measure relates the number of materials borrowed from other libraries to the number of materials from the local collection circulated to borrowers. It is the number of materials borrowed from other libraries through interlibrary loan divided by total circulation multiplied by 1,000.
Visits per Capita [annual] Annual Visits Combined Population	This measure relates the number of visits made to the library to the number of persons in the library's combined service area. It is attendance at the library during the year divided by the combined population served by the library. The measure reflects actual visits to the library.
Reference per Capita Annual Reference Combined Population	This output measure relates the number of information contacts in which a staff member involves information sources to the number of persons in the library's Combined Service Area. It is the number of reference transactions per year divided by the total population served by the library. The measure indicates the average number of times a resident of the service area received staff assistance in using information sources available or accessible through the library.
Total FTE Staff per 1,000 Population FTE Staff (FTE Librarians) x 1,000 Combined Population	This input measure relates information about Staff to Population Served expressed in a decimal. One full time equivalent (FTE) is one paid employee working 40 hours per week. Examples: 40 hours per week / 40 hours = 1 FTE 20 hours per week / 40 hours = .5 FTE

Income. Per capita figures are computed for:
- Local Operating Income per capita
- Total Operating Income per capita

Percentages are calculated for Local Income and Other Income only.

Expenditures. Per capita figures are computed for:
- Materials Expended per capita
- Total Operating Expenditures per capita.
